Interpretation

Asymmetry Index	Laterization
0.007 Formula: (L-R)/(L+R)	Balanced (No HS) Thresholds: • Left HS (Right-dominant) if AI < -0.070839747728 • Right HS (Left-dominant) if AI > 0.046915816971 • No HS (Balanced) otherwise.

Coronal Visualizations

The following images show coronal slices with anatomical T1-weighted background and hippocampal segmentation overlays (30% opacity) combined. Images are rotated 180 degrees for optimal report viewing. Slices 3, 4, 5, and 6 are displayed in a 2x2 grid to provide comprehensive visualization of the hippocampal regions.

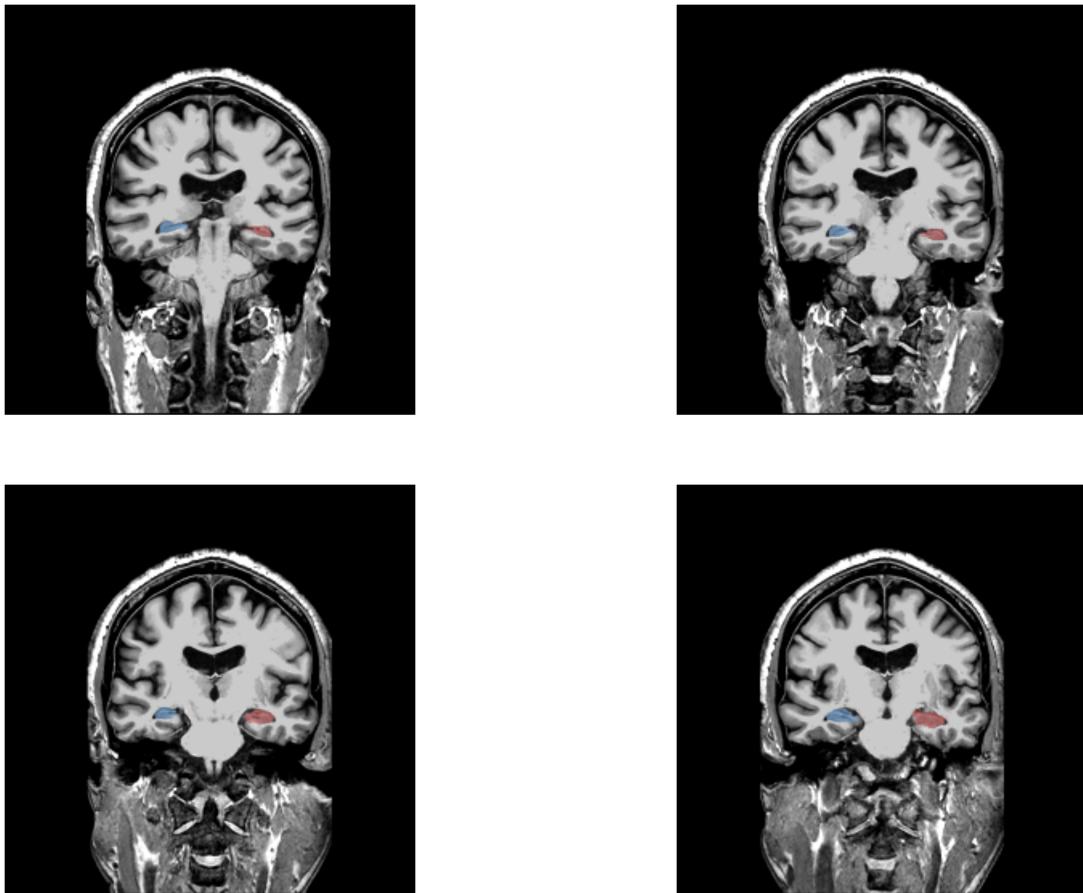

Figure: Coronal slices 3, 4 (top row) and 5, 6 (bottom row) showing T1-weighted anatomical images with hippocampal segmentation overlays at 30% opacity (rotated 180° for optimal viewing).
